PROJECT TITLE: Buy Better		
GUIDE NAME: Mrs. Priya N		

Ecommerce has found its place in the digital era. We have successfully adopted for the trend of online shopping. Online shopping is 'the' way of shopping currently for newer generations. These websites surely provide all the choices in the world in comforts of our homes, but when the user becomes loyal towards such one e-commerce website, User does not always bother to check other platforms of the same product and buy the product at the best possible price.

Our project "Better Buy" makes user is informed about all the different price levels product is available at and choose the best product for the best possible price.

Better Buy is a website which acts as an aggregator of similar product from e-commerce websites. User can compare all different price points at which a product Is available and helps user buy at the most convenient price possible.

Frontend of Better Buy is accomplished using HTML & CSS, In the backend JavaScript is used to scrape data from different e-commerce websites. We use JavaScript libraries like jQuery, ZenRows. Our Project will run on Node.js so that it can be scalable.
